Japan Travel SafeRide™ Transport Service for Inbound Travelers

A New Private Car/Van Service from Airport to Your Home or Self-isolation Point

Tokyo, Japan (July 8, 2020) –Japan Travel KK is pleased to announce the launch of its new SafeRide™ safety-first private transport service designed specifically for inbound travelers to Japan, who need to comply with cross-border entry requirements imposed by the government due to the Covid-19 global health emergency.

SafeRide™ launches in partnership with a fully licensed local provider experienced with private car transport-and-driver services for rent. Together we have researched best practices around the world for safe transport of passengers and optimized these for practical application in Japan. As a result, both our vehicles and the drivers are set up to reduce the likelihood of virus transmission.

Every driver is temperature tested daily, wears a face mask and gloves, and avoids close contact with the customer. If you wish, we also have an option to have drivers tested within 24 hours of your arrival, for the presence of Covid-19 antibodies. The tests come at extra cost. All drivers are bilingual, speaking Japanese and English.

All of our vehicles, including 7-seater and larger vans, promote social distancing between driver and passenger. They are fitted with a hand sanitizer, a driver/passenger separation screen, an ozone diffuser, and free masks for passengers. Vehicles are cleaned thoroughly before and after each use. Cleaners' fluids and wipes are also provided in case you wish to clean your seating area again.

Direct physical interaction is kept to a minimum, with bookings and pre-payment being standard (thus no exchange of cash or receipts). The driver will open the rear of the van to allow you to load your own luggage for added peace of mind, but we can offer assistance if required.

The new service will start on July 13, 2020, servicing Haneda and Narita airports, for the Tokyo region and Kansai International Airport for Osaka. Other airports are available on prior request. Orders can be placed now at the Japan Travel website page:
